

2021 Strategy

With the adoption of its new Strategy 2021, Hôpital Montfort intends to fully assume its mandate as Ontario's Francophone university health institution and to play a fundamental role in research as well as preparing the next generation of health professionals in Ontario. Our Strategy 2021 targets four main objectives:

Become a Clinical Centre of Excellence (CCE) in multimorbidity	Enhance targeted clinical services	Achieve the attributes of an academic teaching hospital	Fulfill our provincial mandate
<p>People benefit from a recognized CCE in multimorbidity.</p> <p>People targeted by the CCE in multimorbidity benefit from completely integrated care.</p> <p>The CCE in multimorbidity and the Orléans Health Hub are closely aligned.</p>	<p>Babies and their mothers have access to care as of 32 weeks gestation.</p> <p>A person receiving mental health care benefits from a Francophone therapeutic milieu and services focused on recovery.</p> <p>The patient no longer waits needlessly for surgery. The volumes in orthopaedic, oncological or other high-demand surgeries are increased.</p>	<p>Montfort's ranking as a research hospital in Ontario has improved.</p> <p>The implementation of targeted residency programs in basic specializations for Canadian Resident Matching Service positions at Montfort is complete.</p> <p>People benefit from activities supporting the development of a culture of knowledge.</p>	<p>Francophone patients from everywhere in Ontario benefit from telemedicine consultation services with physicians and other health professionals for one of the targeted programs and the CCE in multimorbidity.</p> <p>The ISM assumes the functions of the Centre d'excellence en éducation en français, including internship coordination.</p> <p>Francophone professionals in Ontario benefit from professional support and training from Montfort.</p>
